

## SPRINT – 2

In Sprint – 2 We created a search bar to search for different flights. We analysed the dataset and predicted the flight delays.

### SEARCH PAGE

### PREDICTION PAGE

A screenshot of a flight prediction form. The form is located on the left side of the page, set against a light blue background. It contains several input fields and dropdown menus, each with a label above it: "Flight Number:" followed by a text input field; "Month:" followed by a text input field; "Day Of Month:" followed by a text input field; "Day Of Week:" followed by a text input field; "Origin:" followed by a dropdown menu; "Destination:" followed by a dropdown menu; "Scheduled Departure Time:" followed by a text input field; "Scheduled Arrival Time:" followed by a text input field; and "Actual Departure Time:" followed by a text input field. At the bottom of the form is a "SUBMIT" button. To the right of the form is a large image of a white commercial airplane with four engines, viewed from a high angle, flying over a solid blue background.
